

Voter Information Hub

Ahead of the election, you should create a hub within your center or school that has to do with the 2018 Elections. Families should be able to find key dates and information about how to register there. It should also serve as a way to build a community around the election and motivate everyone to participate by showcasing how others are engaging in the election. Below are a few ways to enhance your Voting Bulletin Board.

Things to Do!

- Post people's commitment to vote cards, the program with the most pledge cards will win a gift card!
- Create a tracker/visible representation of how many people have been registered.
- Post photos of families and their students voting together during early voting (and social media) – must make announcement or post on social media that the center wants these pictures. Motivate students to get their families to vote!
